Figure 1. Hille 100 rolling mill

Equations are prepared with Equation Editor, and numbered serially, as in this example:

$$y = \int_{\infty}^1 3x^3 + 3x - \frac{1}{3} \frac{dy}{dx} \quad (1)$$

The references are written in one of the following two methods:

1. Method 1: to mention the reference within the text, writing the author's name and publishing year, e.g. (Garnero and Godone, 4, 2013)...

Or, for an Arabic reference (أحمد جاب الله و محمد حدود، 2014)

In this case, references are arranged alphabetically, listing Arabic references first, then the references in English (or any other language). For example:

References (Times New Roman, 12, Bold)

أحمد جاب الله و محمد حدود: دراسة تأثير طاقة الطرق على صلادة المعادن (الحديد – النحاس – الألومونيوم)، مجلة العلوم والتقنية، العدد الأول، يونيو 2014.

...

Garnero G., Godone D., 2013, Comparisons between different interpolation techniques. International Archives of the Photogrammetry, Remote Sensing and Spatial Information Sciences. XL-5/W3, 139-144.

...
المجلة الدولية للعلوم والتقنية
International Science and Technology Journal

2. Method 2: to place, in the text, a reference number next to the quoted statement, like this [1].

In this case, references are numbered and arranged according to their priority as mentioned in the text. For example

References (Times New Roman, 12, Bold)

[1]. أحمد جاب الله و محمد حدود: دراسة تأثير طاقة الطرق على صلادة المعادن (الحديد – النحاس – الألومونيوم)، مجلة العلوم والتقنية، العدد الأول، يونيو 2014.

[2]. Garnero G., Godone D., 2013, Comparisons between different interpolation techniques. International Archives of the Photogrammetry, Remote Sensing and Spatial Information Sciences. XL-5/W3, 139-144.
